

Illuminated solar picture frame

gain by nature!

The illuminated solar picture frame is the most innovative product for every picture!

On the back of the frame are two round solar modules, which produce electricity, when in daylight. The energy is stored in two rechargeable batteries.

With this energy, every picture is automatically illuminated by night.

3 years guarantee

made in Germany

perfect gift

wooden frame

special design

ecologically friendly RAM batteries

solar modules on the backside

insert a self-made picture of your choice

for the nursery or for Christmas
